

MAHYA-IIIT WINTER SCHOOL TURKEY 2017

ISLAMIC SCIENCES *Past and Future Perspectives*

22-26 January 2017

Venue IBB ZEYTINBURNU SOSYAL TESISLERI, ISTANBUL, TURKEY

The First Mahya-IIIT Turkey Winter School took place on 22-26 January 2017.

The 5-Day programme consisted of a series of talks presented in Turkish (with one day in English) to high achieving, mainly Turkish undergraduate students, during their winter academic break. Presentations were tailored to the academic standard of the students and largely focused on many aspects of the core courses of the Summer Schools and contemporary issues.

Specialists in their respective fields introduced participants to key topics in an effort to expand their knowledge, the aim being to give them an overview of the components that make up the subject, in an effort to encourage them to see how these fit into the modern networked world. Some of those proficient in English will be given an opportunity to participate in the Summer School programme. One of the graduates of the Summer School programme helped in the organisation and coordination of the Winter School.

All participants were given a certificate of attendance, and the boxed set of IIITs Books-in-Brief Series as well as a set of IIIT publications in Turkish.
